

## Wabash Communications to provide Temporary WiFi Hotspot at Rockford Community Building

Wabash Communications is working to set up a temporary Wi-Fi hotspot at the Rockford Community Building for students who do not have home Internet access to use during the COVID-19 shutdown. The building will not be open, but the Wi-Fi will be accessible in the parking lot. The connection will be unsecured, so no password will be necessary.

The projected date that this connection will be available is Wednesday, March 18. A notice will be posted on the Parkway Local Schools homepage when Wabash Communications lets us know it is available.
